Ziphozihle Mqopi

92/100

Competent

FORMATIVE ASSESSMENT

HEALTH, SAFETY, QUALITY AND LEGISLATION

Module #	671101000-KM-01
NQF Level	level 4,
Notional hours	50
Credit(s)	Cr 5
Occupation or Specialisation	671101000: Occupational Certificate: Electrician
Associated Occupation	671101: Electrician

Z

About the Formative Assessment	
Purpose	The purpose of this Formative Assessment is to evaluate learners understanding on the specific outcomes and/or assessment criteria and prepare the learner for the summative assessment. This will show that the learner is ready to be assessed.
Context	This assessment represents the Formative Assessment component and should be completed in the classroom/training room.
Resources	The following are resources needed for this assessment: 1. Learner Guide; and 2. Assessment Preparation.
Instructions to Facilitators	Facilitators will be required to: • Explain the completion of the Formative Assessment to each learner; and • Interview the learner on similar questions, should he/she not be able to write.
Instructions to Learners	Learners will be required to: • Complete the Formative Assessment as per the instructions. • Ensure that all questions are completed. • Ensure that the completion of the workbook is their own work. • Ensure that all annexures are attached to the workbook and clearly referred to;
Assessment Time	Learners are required to complete this assessment within the allocated time frame/hours.

ASSESSMENT APPEAL APPLICATION FORM

LEARNER'S NOTICE OF ASSESSMENT APPEAL

TO: The Internal Moderator

A meeting with the internal moderator is hereby requested to discuss the outcome of my assessment.

Internal moderator name _____

Date of submission: _____

Name of employee assessed: _____

Name of Assessor: _____

Date of feedback session: _____

Grounds for Appeal

No	Tick the applicable ground(s) for appeal	Tick
1	The assessment did not follow the laid down procedure	
2	Not all evidence available was taken into account during the assessment	
3	The assessor was not a subject matter expert nor was a subject matter expert present during the assessment process	
4	The assessment was not according to the performance criteria and the range statement stipulated in the unit standard	
5	Not all the range items were available for the assessment	

Z

PRE-ASSESSMENT MEETING CHECKLIST

Points Assessor must cover in the initial meeting with the learner - Please tick

Item	Points to be covered	Tick
1	Welcome the candidate **and put them at ease**	✓
2	**Explain the purpose of the meeting** (why you are there and how long the meeting will take)	✓
3	**Explain the** ▪ NQF ▪ Credits ▪ Certification process ▪ Learning pathways	✓
4	**Explain** ▪ Who is involved in the assessment and their role (learners, coach, assessors, managers, moderators) ▪ Principles of assessment (fairness, confidentiality, validity, sufficiency)	✓
5	**Explain the assessment process?** ▪ Check learner readiness for assessment (logbook / self assessment) ▪ Assessment contract to be completed ▪ Preparation of learner (this meeting) ▪ The assessment (observation and knowledge questionnaire) ▪ Judgement of the evidence ▪ Outcome of assessment (competent, not yet competent, need further evidence)	✓
6	**Give Learner copies of the following documentation and explain each document** ▪ The Assessment Guide which includes ○ The relevant unit standard (s) ○ Assessment contract ○ Assessment plan ○ Observation checklist ○ Knowledge checklist	✓
7	**Discuss the assessment plan** (complete the assessment plan document) ▪ Allow the learner to participate in the decisions made ▪ Agree on dates, time and venue for the assessment and feedback ▪ Agree on evidence the learner can submit ▪ Agree and explain the assessment methods ▪ Identify and discuss special assessment needs of the candidate ▪ Identify and eliminate unfair barriers (language, disability etc) ▪ Discuss and agree on witness requirements	✓
8	**Tell the candidate his/her rights and responsibilities, the assessment procedures and policies** ▪ How many times they may be assessed ▪ Appeals process / procedure ▪ Reassessment policy	✓
9	**Ensure the assessment environment is appropriate** or make special arrangements	✓
10	Discuss moderation	✓
11	Allow the learner opportunity to clarify any items discussed	✓

Z

LEARNING UNIT 1:

Safety, health, environment, risk and quality principles in the workplace

Learning Outcome 1:	KT0201 Legislation and regulations for workplace safety within electricity
Learning Outcome 2:	KT0202 Occupation health and safety legislation
Learning Outcome 3:	KT0203 Safety precautions and safe practices for working within industry
Learning Outcome 4:	KT0204 Personal protective equipment
Learning Outcome 5:	KT0205 Safety symbols and colour coding
Learning Outcome 6:	KT0206Fundamentals of isolating and locking out equipment and circuits
Learning Outcome 7:	KT0207 Fundamentals of securing worksites
Learning Outcome 8:	KT0208 Protection devices
Learning Outcome 9:	KT0209 Causes, prevention and control of fires
Learning Outcome 10:	KT0210 Hazard identification and risk principles
Learning Outcome 11:	KT0211 Environmental, protection and pollution concepts
Learning Outcome 12:	KT0212 Basic first Aid
Learning Outcome 13:	KT0213 Incident reporting.
Learning Outcome 14:	KT0214 Evacuation procedures.

Task	Questions Description	Marks
1.	Identify and explain various types of personal protective equipment	10

- Hard hat : A safety gear that protects against falling objects or any other impacts
- Safety goggles : shields the eyes against sparks, ~~harmful~~

Task	Questions Description	Marks
2	Identify and describe Safety signs in terms of associated risk and safe conduct	10

- ~~Caution signs~~

- Danger signs: Indicate a high-risk situation that could result in death or serious injury if not avoided this can include high voltage areas or cofined spaces. safe conduct. Take extreme caution Follow prace dures and use PPE
- Warning signs: Alert people to pantential nazards like falling objects, toxic substances Safe conduct: Be alert, watch your step and take necessary pre cautions
- Caution signs: Highlight low to moderate risks like minor hazards or safety reminders. Safe conduct: Stay aware of surrounding and foilow guidelines.
- Mandatory signs: Indicate required actions like wearing PPE or following specific safety procedures. safe conduct: Comply with restrictions to avoid nazards

- ~~Prohibition signs~~

- Emergency signs: Provide emergency information like exit routes, first aid iarations or emergency phone numbers. Safe conduct: know the signs and respond quickly in emergencies.

Z

Task	Questions Description	Marks
4	Describe the regulations for the prevention and control of fires and the causes, effect and implication of fires	9

Regulations for fire prevention and control of fires

- Fire-resistant construction : use fire-rated materials for walls, floors and doors to limit fire spred
- Fire alarm and sprinkler systems : ~~Install de~~ Install detection and suppression systems in commercial and residential building
- Active and passive fire protection : use active systems alarms, extinguishers to combat fires and passive systems (fire doors, smoke barriers) to contain them
- Ensure safe evacuation with enough exits emergency lighting

Cause of fires

- Electrical faults: overload circuits and faulty appliances are common causes of electrical fires.
- Unatteded open flames: Cigarattes, cooking equipment can ignite fires if left unattended
- Flammable materials: Improper storage of flammable substances ~~can cause fire~~ ignite fire.

Effects of fires

- Property damage
- Injuries
- Enviromental impact

~~Implication of fires~~

- Follow fire safety rules : Not following fire regulations can lead to legal penalties, higher insurances costs
- Be prepared: understanding fire risks and having safety measures like alarms, sprinkles and evacuation plan helps protect people reducing harm and damage during fires

Standards

- Check wiring, cabling and equipment for safety
- Test Earth fault protection and other safety features
- Verify correct installation of electrical equipment and appliances
- Check for compliance with load calculations and energy efficiency
- Investigate electrical accidents and incidents
- Provide guidance on electrical safety and regulations
- Enforce electrical safety regulations and standards
- Verify compliance with electrical safety standards and regulations

12

Task	Questions Description	Marks
7	Explain and discribe earthing	12

Earthing is the process of connecting electrical systems or equipment to the surface. This connection provides a safe for fault current to go back to the ground preventing electrical shocks and electrocution. It helps prevent electrical fires and explosions by ensuring electrical equipment is at the same pontential as the earth, reducing the risks of electrical shock from faulty equipment.

Earthing systems include Earth electrodes are buried in the ground to provide a connection to earth, while earthing conductors connect equipment to the earth electrode. Proper earthing is essential for safe and relrable electrical installations and it provides a low-resistant path for fault currents to flow. By connecting equipment to

De-energization

De-energization refers to shutting or disconnecting off energy sources to equipment. Removing or isolating energy sources like electricity, hydraulics ~~or pneumatics~~ making equipment safe for maintance or repair work.

LOCK OUT PROCEDURES AND WORK INSTRUCTION CONTAIN

Lockout procedures and work instructions should contain

- Indentify equipment to be locked out
- List energy sources to be isolated
- Specify lock out devices and tags to use
- Describe shutdown sequence
- Explain isolation and securing of energy sources
- Verify equipment is de-energized
- State safety measures for hazardous energy
- ~~Outline testing to ensure isolation~~
- ~~Describe work completion and restart steps~~
- ~~Include responsibilities and sign-off for workers.~~
- How and where lockout devices are installed
- How stored energy is controlled and subsequently de-energized
- The description of work completion and restart steps.

10	Name four classes of fire and their description	4

- ~~Classes A~~ Class A : Fires involving materials like wood, paper or cloth. It can be extinguished with water or foam.
- ~~Classes B~~ Class B : It involves flammable liquids such as gasoline, paint remover or grease. It can be extiguished with foam or dry powder.
- Class C : This involves ~~electrical~~ electrical fires like computers, appliances. It is best extinguished with Carbon dioxide or dry powder to prevent electrical shock
- Class D : This involves combustible metals usually in industries. The combustible metals like magnesium or titanium. It is best extiguished with dry powder.

Application for Assessment

First Attempt □ Second Attempt □ Third Attempt□ RPL □

Observer/Witness required: Yes/No

Name: _____

Contact Number: _____

Interpreter required: Yes/No

Name: _____

Contact Number: _____

Was Employer informed of request for Assessment: Yes/No

Type of Assessment: Theoretical

Practical

Recommendation for Assessment

The applicant has completed his/her training, has prepared for the assessment and is now ready to be assessed.

The ETDP Practitioner believe that the candidate is ready for the assessment because he has completed the relevant unit standard.

Z

Have you received an application to assess the candidate? Yes
What assessment methods do you consider using? (observation, assignment, presentation, etc.) Explain method. 1. Written Assignment : Printed Questionnaire 2. Observation : As per Practical Assessment Guide 3. Interview : List of Questions as per Practical Assessment Guide after Practical Observation
What resources would you require to conduct the assessment? 1. Assessor toolkit 2. Theoretical assignment 3. Practical assessment 4. Learner toolkit
How would you sequence your activities? Explain 1. Record preparation process 2. Meet with group/candidate and explain assessment procedure – how you are going to conduct the assessment 3. Learner will write summative assessments 4. Conduct observation in workplace where applicable 5. Complete learner toolkit 6. Complete assessor toolkit
