# Curriculum Vitae

**Electrical Energy Trainee (Solar PV Focus)**

**Personal Details**

ID Number: 0802030118086

Name: Ziphozihle

Surname: Mqopi

Gender: Female

Address: House No. 44, Van Heerden Rd, Estera, Germiston, 1428

**Career Objective**

Motivated entry-level Electrical Energy trainee with hands-on exposure to Solar Photovoltaic (PV) equipment. Seeking an opportunity to grow as a designer, installer, and trouble-shooter of electrical energy solutions, contributing to safe, efficient, and sustainable energy systems while building strong technical competence and professional discipline.

**Key Skills**

• Basic understanding of Solar PV components (panels, inverters, charge controllers, batteries)

• Equipment handling and basic installation support

• Trouble-shooting mindset and safety awareness

• Basic electrical measurements and cable management

• Teamwork, reliability, and willingness to learn

• Good communication in English (Home Language)

**Education**

Grade 12 (2025) – New Horizon College, Bethlehem

Final Result: Bachelor Pass

Subjects & Results:

• Mathematics: 45%

• Physical Science: 52%

• English Home Language: 63%

**Work Exposure (Practical)**

Hluvukanie Labs (Family Company) – Solar Photovoltaic Equipment Exposure
• Assisted with basic handling and setup of PV panels, inverters, batteries, and wiring.
• Observed system layout, mounting methods, and safe work practices.
• Supported basic fault-checking under supervision (visual inspections, connections).
• Gained exposure to real-world installation environments and teamwork on site.
• Developed awareness of safety protocols and tool handling.

**Hobbies & Interests**

• Travelling – enjoys exploring new places and communities, which builds adaptability, cultural awareness, and confidence in working in different environments.
• Personal interest in renewable energy – enjoys learning about solar energy solutions and how they can improve access to electricity in communities.
• Practical learning – enjoys hands-on tasks and learning by doing, especially with tools and equipment.

**Career Ambitions**

To develop into a competent Solar PV and Electrical Energy professional capable of:
• Designing basic renewable energy system layouts.
• Installing and commissioning Solar PV systems safely and correctly.
• Diagnosing and resolving common system faults.
• Continuously upgrading technical skills through training and certification.
• Contributing to sustainable energy access and community development.
